An achievement culture

Great achievements have common elements, whether they be accomplished in sport or business.

Kurt Asle Arvesen is one of the world's most experienced professional cyclists. He won the world championship for 23-year-olds in 1997, and was among the top performers in the 2009 World Championship. Arvesen belongs to an exclusive club of riders who have won several stages in the three Grand Tours – Giro d'Italia, Vuelta a España and Tour de France. As an all-rounder, his main role is to be a *domestique* – a racer who works for the benefit of his teammates.

Reaching the top in our professional fields

We've travelled a long way with Kurt Asle Arvesen since he was a young cyclist. In his early years, we supported him and followed him closely. We still have a close relationship. We've learnt from each other how to reach the top in our professional fields. This lesson has turned out to be invaluable for our achievement culture at Langset. We know that team spirit, commitment, ability and quality are important in securing results.

I love being part of a great team

Being a competitive cyclist is a mixed-up life. To rank among the best, you not only have to perform as an individual, but also need to be a part of a team which understands the key factors involved in competing internationally. I love being part of a great team, and it's naturally a fantastic experience and a crazy feeling to win a road stage in a major race like the Tour de France.

Kurt Asle Arvesen
Professional cyclist

The team made for you:

INDUSTRIAL MANPOWER

We provide highly qualified **industrial manpower and engineers** in all our business segments. To secure our own and the customer's level of expertise, we provide training and education.

OIL AND GAS

Through our supplies of **pressure vessels and heat exchangers** to the most demanding companies in the world, we have proven our technology, ability and quality. We provide **structures and prefabricated solutions** in an EPC philosophy: engineering, procurement and construction.

SHIP AND MARITIME SERVICES

We have specialised in **repair, overhaul, rebuilding and on-board services** for ships, offshore installations and vessels. With our experienced and qualified workforce, we deliver on time and in accordance with customer specifications – as a turnkey contract or on an hourly reimbursable basis.

PROCESS AND ENERGY

As well as being a recognised supplier of **maintenance and modification services**, we supply **mechanical components and system solutions** to the process and energy industry worldwide. Through our knowledge of the industry, we are able to deliver throughout the lifecycle of a plant, from the design phase to decommissioning.

> Project execution > Maintenance and modification > Document review services > EPCI

Our company and our relationships

Our head office is located in Molde at the west coast of Norway. We have a number of workshops and service facilities along the whole Norwegian coast. Over the past 20 years, we have built up substantial and valuable experience through our relations with national and international players. This has allowed us to grow into a well-regarded contractor and preferred partner in our key business areas. We can deliver in accordance with client specifications, and flexibility is our strength.

Through our network of companies and multi-disciplinary expertise we are the team made for you.

Health, safety and the environment (HSE)

We always give top priority to HSE. Our goal is to operate in such a way that we avoid harm to people, material assets and the natural environment.
